## EM.1 ACTIVATION PROCESS

---

Note. EM.1® has microbes which are dormant. The process of activation will make them activated and ready for use.

### Requirement

1. 1L of EM.1
2. 1L of Molasses
3. 20L Container/bucket – Plastic with airtight cap, non-transparent.
4. 18L of clean water – Tap water must be left for about 5-10 minutes to evaporate.

### Process

1. Put 5L of water into the 20L container
2. Mix well 1L of EM.1 and 1L of molasses into 20L litre container
3. Fill in the rest of water and mix well to make the 20L container full.
4. Close the container – airtight
5. Place it where out of direct sunlight in a room temperature
6. Release pressure in day 3 for few seconds and close, in day 6 for few seconds and close, day 8 EM.1 is activated and ready to use
7. Activate EM will have a good smell, with white layer cover at the top

### Usage

1. For Agriculture: Use 1L of activated EM to 500L of water for irrigation, For making fertilizer or Bokashi please contact us
2. For Waste Management: Apply activated EM in a septic tank to the ratio of 1L to 1,000 of waste water. For Kitchen Waste – Put your kitchen waste in a collection area and spray activated EM.
3. For Livestock: Use 1L of activated EM to 500L of water as drinking water to your animals.
